

Sudais Sarfraz

Software Engineer experienced in building and deploying scalable web applications using MERN, with a strong focus on backend development, REST APIs, authentication, RBAC, databases, Docker, and CI/CD. Experienced in delivering end-to-end applications, including e-commerce and AI-integrated systems.

WORK EXPERIENCE

Devline Solutions

Full Stack Intern

Present

- Completed full-stack development roadmap covering **React, Node.js, Express.js, REST APIs, SQL, databases, authentication, RBAC, state management, and DevOps**.
- Developed a complete **e-commerce application** with customer interface, admin dashboard, authentication, RBAC, cart, and payment checkout.
- Implemented **Zustand** for client-side state management and **TanStack React Query** for API caching, mutations, loading, error handling, and server-state synchronization.
- Built backend APIs using **Node.js, Express.js, and REST architecture** with authentication and role-based authorization.
- Applied **Git/GitHub workflows** and development practices throughout project implementation.

EDUCATION

BS Software Engineering

University of Central Punjab, - 3.21

2022 - 2026

PROJECTS

MindMesh | AI-Assisted Project Planning System [🔗](#)

- Led **backend development** for an AI-powered project planning platform integrating **LLMs and OpenAI Whisper**.
- Designed **REST APIs, JWT authentication, RBAC, multi-project management, and WebSocket notifications**.
- Implemented hybrid **MongoDB + PostgreSQL architecture** for flexible AI content and structured project data.
- Integrated **4 AI agents** for project management, outreach, meeting intelligence, and analytics.
- Converted meeting recordings into **transcriptions, summaries, tasks, and sprint planning artifacts**.

Organic Store | Full-Stack E-Commerce Platform [🔗](#)

- Built a complete **full-stack e-commerce platform** with customer storefront and **admin dashboard**.
- Implemented **JWT authentication, RBAC, protected routes, and role-based admin access**.
- Developed product, cart, order, and user management with **RESTful APIs and MongoDB**.
- Integrated **Zustand** for global client state and **TanStack React Query** for server-state management, caching, mutations, and API synchronization.
- Implemented **payment checkout** and complete order-processing workflow.
- Developed responsive UI using **React.js and Tailwind CSS** with reusable components.

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, C++, Java, SQL, HTML5, CSS3
- **Frontend:** React.js, Next.js, Tailwind CSS, Bootstrap, React Router
- **Backend:** Node.js, Express.js, REST APIs, MVC, JWT, RBAC, WebSockets
- **Databases:** MongoDB, PostgreSQL, MySQL, Mongoose, Prisma, Redis
- **State Management:** Zustand, TanStack React Query
- **DevOps:** Docker, Docker Compose, GitHub Actions, CI/CD, Git, GitHub, Vercel, Render
- **AI & APIs:** OpenAI API, Whisper, LLM Integration, Prompt Engineering, Postman
